Introduction

At the end of this chapter, you will be able to:

1. Request help for Amadeus Fare System
2. Explain Amadeus Fare System
3. Explain Amadeus Fare Entries
4. Recognize appropriate fare entry for any situation

How do I go for Help?

If you do experience some problems, please find the Amadeus online help page by typing:

HE FARE

System response:

FARES INDEX	EN	5JUN14 0927Z
HE FARES

Summary of the Fare Quote and Pricing Transactions

There are five main features in Amadeus Fares:

- Fare Tools
- Fare Quote Display
- Informative Pricing
- Itinerary Pricing
- Best Buy

Amadeus fare quote entries are divided in two types of transactions:

- **FQ** The fare quote transactions display information based on the data contained in an itinerary
- **FX** The itinerary pricing transactions price a specific itinerary.

The following tables describe the fare quote and itinerary pricing transactions, and show whether a PNR is required, and also each entry is main entry or follow-up entry.

Fare Calculation Entries

Entry	Request	PNR	Main/Follow-Up
FQA	IATA rates of exchange	No	Main entry
FQB	Bankers' rates	No	Main entry
FQC	Convert currencies	No	Main entry
FQM	Mileage calculation	No	Main entry
FQX	Excess baggage rate	No	Main entry

Fare Quote Display

Entry	Request	PNR	Main/Follow-Up
FQD	Fare display	No	Main entries
FQK	Tax breakdown	No	Follow-up entries
FQN	Fare notes	No	Follow-up entries
FQR	Fare routing	No	Follow-up entries
FQS	Booking code information	No	Follow-up entries

Informative Pricing

Entry	Request	PNR	Main/Follow-Up
FQP	Informative pricing	No	Main entries
FQH	Vertical fare calculation	No	Follow-up entries
FQQ	Fare components of a quoted fare (after FQP)	No	Follow-up entries

Itinerary Pricing

Entry	Requests	PNR	TST Creation
FXP	Itinerary pricing	Yes	Yes
FXT	Selects and stores the fares with the PNR when multiple fares are offered (as a follow-up entry after FXP,FXX)	Yes	Yes
FXX	Itinerary pricing	Yes	No

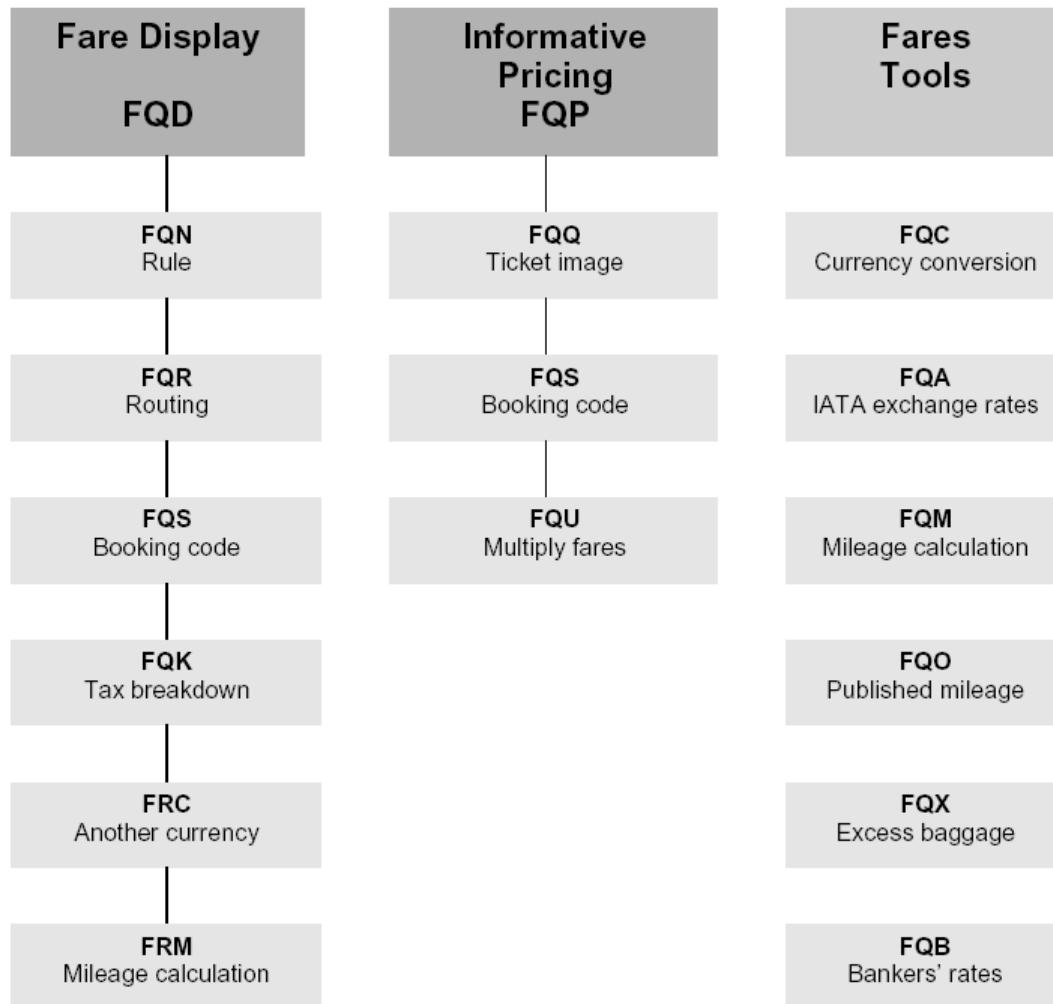

Best buy

Entry	Requests	PNR	TST Creation
FXA	Best buy, search for lower applicable fares	Yes	No
FXB	Best buy, the system automatically rebooks an itinerary in a class which is lower than the class in the booked itinerary	Yes	Yes
FXL	Best buy, display the lowest possible applicable fare, and advise about seat availability, but does not rebook the PNR	Yes	No

FQ Entries

HE FQD
HE FQP
HE FARES

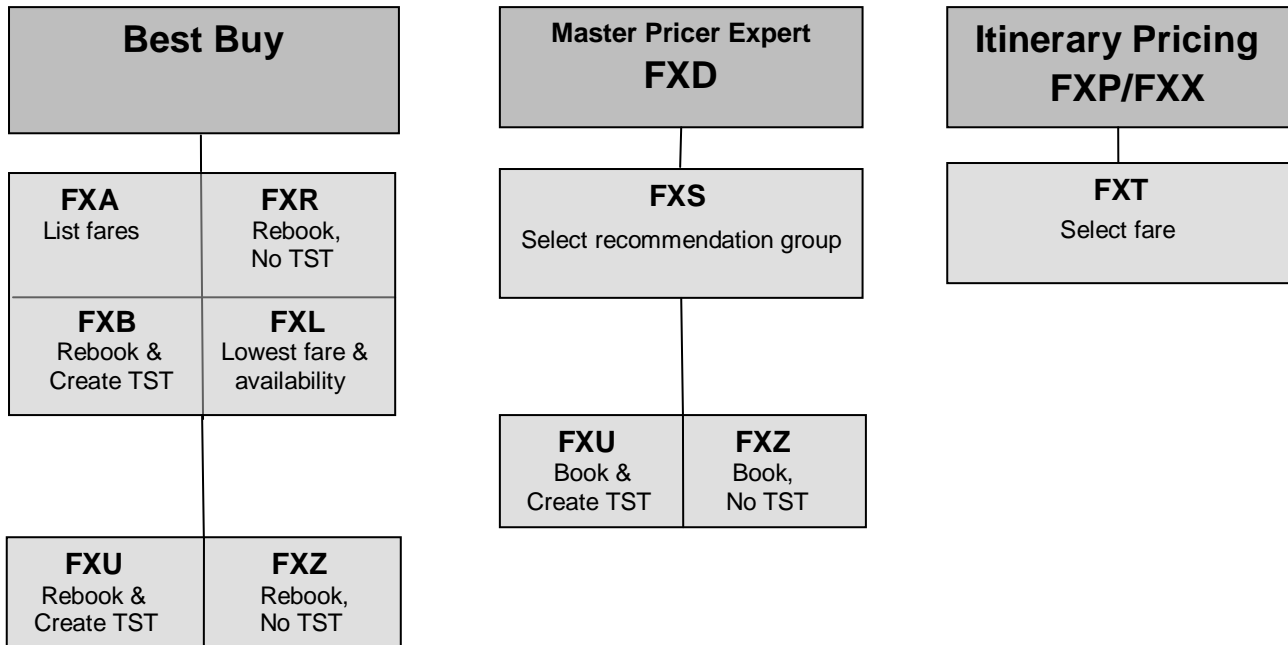

The following diagram shows the Fares entries for Fare Display, Informative Pricing, and Fares Tools.

FX Entries

HE FXA
HE FXD
HE FXP

The following diagram shows the Fares entries for Best Buy, Master Pricer, and Itinerary Pricing.

Follow-up entries:

CHAPTER 1: FARE QUOTE TOOLS

At the end of this chapter, you will be able to:

1. Find IATA Rate of Exchange (ROE)
2. Find Bank Selling Rate (BSR)
3. Convert one currency to another currency
4. Calculate mileage between a city pair
5. Calculate mileage between number of cities
6. Calculate excess baggage charge

IATA Rates of Exchange

HE FQA

The IATA rate of exchange by transaction **FQA** allows you to request rates of exchange between NUCs and designated currency.

Example: **FQAIRAN**

```

FQAIRAN
          EFF 01MAY18 ***  DISC INDEF
1 NUC      48331.00 IRR      ROUNDING UP TO      1000.00  IRR

NUC - NEUTRAL UNIT OF CONSTRUCTION
IRR - IRANIAN RIAL
>
                                     PAGE 1/ 1
  
```

Here you may find some additional entries.

FQA*DE
FQAGERMANY
FQAGBP
FQAEUR
FQA*FRA
FQATHAILAND/01FEB18

You may check **IATA** rates of exchange for foreign country, for past dates up to 12 months.

For example:

FQAIRAN/10JAN18

System response:

```

FQAIRAN/10JAN18
          EFF 01JAN18 ***  DISC INDEF
1 NUC      41486.80 IRR      ROUNDING UP TO      1000.00  IRR

NUC - NEUTRAL UNIT OF CONSTRUCTION
IRR - IRANIAN RIAL
>
                                     PAGE 1/ 1
  
```

Banker's Rates

HE FQB

The **FQB** transaction displays a list of Banker's rates for a given currency. You can find the following information:

- Current Bankers selling rates (BSR) (Default display)
- Past BSR from the previous year

To display the BSR for USD, enter:

FQBUSD

System response:

```

FQBUSD
LIST OF BSR FOR USD EFF 05MAY18
1 AED = 0.272293 USD
1 AFN = 0.014237 USD
1 ALL = 0.009418 USD
1 AMD = 0.002094 USD
1 ANG = 0.558659 USD
1 AOA = 0.004258 USD
1 ARS = 0.045045 USD
1 AUD = 0.752378 USD
1 AWG = 0.555555 USD
1 AZN = 0.588054 USD
1 BAM = 0.612670 USD
1 BBD = 0.50      USD
1 BDT = 0.011945 USD
1 BGN = 0.613801 USD
1 BHD = 2.659574 USD
1 BIF = 0.000571 USD
1 BMD = 1.00      USD
1 BND = 0.750719 USD
>
PAGE 1/ 9

```

The following table lists the other FQB entries you can make:

Entry	Description
FQB*NO FQB NORWAY FQB*OSL	BSR for a country
FQB IRR/10FEB18	BSR for past date
FQB KRW	BSR for a currency

Converting Currencies

To convert a foreign currency for example Swedish Krona into the Iranian Rial enter:

FQC100SEK/ IRR

System response:

```
FQC100SEK/ IRR
BSR CONVERSION OF SEK TO IRR
IRR 475000 - ROUNDED AS FARES
IRR 475000 - ROUNDED AS OTHER CHARGES
IRR 474446 - AMOUNT TRUNCATED
BSR USED 1 SEK = 4744.46532 IRR EFF 05MAY18

ROUNDING OF FARES UP TO 1000 IRR
ROUNDING OF OTHER CHARGES UP TO 1000 IRR

SEK - SWEDISH KRONA
IRR - IRANIAN RIAL
>
PAGE 1/ 1
```

Below you may find some additional entries.

FQC100AUD/AED

FQC500USD/EUR/08MAR18

FQC37.87NUC/SGD

FQC1000THB/NUC

You may request currency conversion at any of both conversion rates you would like, by indicating the different codes. For example:

Code	Rate
S	BSR
C	ICH
A	All rates

Example:**FQC100EUR/IRR/A**

System response:

```
FQC100EUR/IRR/A
BSR CONVERSION OF EUR TO IRR
IRR 5033000 - ROUNDED AS FARES
      IRR 5033000 - ROUNDED AS OTHER CHARGES
IRR 5032770 - AMOUNT TRUNCATED
BSR USED 1 EUR = 50327.7033 IRR EFF 05MAY18

BBR NOT AVAILABLE

ICH CONVERSION OF EUR TO IRR
IRR 5734000 - ROUNDED AS FARES
IRR 5734000 - ROUNDED AS OTHER CHARGES
IRR 5733344 - AMOUNT TRUNCATED
ICH USED 1 EUR = 57333.44867 IRR EFF 01MAR18

ROUNDING OF FARES UP TO 1000 IRR
ROUNDING OF OTHER CHARGES UP TO 1000 IRR

EUR - EURO
IRR - IRANIAN RIAL
>
PAGE 1/ 1
```

You may convert NUC amount into a currency, here is an example for Singapore dollars:

FQC40.45NUC/SGD

System response:

```
FQC40.45NUC/SGD
CONVERSION OF NUC TO SGD
SGD 54.00 - ROUNDED AS FARES
SGD 53.13 - AMOUNT TRUNCATED
ROE USED 1 NUC = 1.313587 SGD EFF 01MAY18

ROUNDING OF FARES UP TO 1.00 SGD

NUC - NEUTRAL UNIT OF CONSTRUCTION
SGD - SINGAPORE DLR
>
PAGE 1/ 1
```

Calculating the Mileage

To request a mileage, display between Paris and Singapore via the following points, enter:

FQMPARSTOLONDELBOMSIN

System response:

FQM	PAR	STO	LON	DEL	BOM	SIN					
CTY	DC	TPM	CUM	MPM	DC	LVL	<HGL	>LWL	25M	XTRA	
PAR	2										
STO	2	EH	926	926	1111	EH 0M	185	0	1388	0	
LON	2	EH	863	1789	256	EH EXC	0	1469	320	0	
DEL	3	EH	4163	5952	5288	EH 15M	129	136	6610	0	
BOM	3	EH	708	5960	5427	EH 10M	9	262	6783	700	
SIN	3	EH	2437	9097	8330	EH 10M	66	351	10412	0	
>											PAGE 1/ 1 >

The different components are explained on this table:

Code	Explanation
CTY	City column, which includes the cities in the itinerary
2	Tariff conference area
DC	Direction code for TPM
TPM	Ticketed point mileage
CUM	The cumulative total of the TPMs from the origin
MPM	Maximum permitted mileage
DC	Direction code for MPM
LVL	Level, indicate the mileage surcharge The Codes that can appear in this column are: 0M WITHIN MILEAGE 5M 5% SURCHARGE 10M 10% SURCHARGE 15M 15% SURCHARGE 20M 20% SURCHARGE 25M 25% SURCHARGE Note: When EXC appears, the mileage surcharge is more than 25M.
<HGL	Higher level mileage, indicates the number of miles available before reaching the next higher surcharge level.
<LWL	Lower level mileage, indicates the number of miles over the previous surcharge level
25M	Indicates total number of miles the TPM can be increased before the mileage exceeded the 25% surcharge level.
XTRA	Extra, indicate number of extra miles allowed. This applies to domestic segments only.

Requesting a Mileage Calculation from a PNR

The FRM transaction allows you to display a mileage calculation from an active PNR.

Here is an example:

```

RP/THR1A0980/THR1A0980          SH/SU  5MAY18/1042Z  QMQ9BX
THR1A0980/9113SH/5MAY18
1.AMADEUS/PERSIA
2 LH 601 M 10JUN 7 IKAFRA HK1      0255 0540  *1A/E*
3 LH 246 M 10JUN 7 FRAMXP HK1      1 0735 0845  *1A/E*
4 AZ1017 T 20AUG 1 MXPFCO HK1      1 0645 0800  *1A/E*
5 OS8892 Q 28AUG 2 FCOVIE HK1 0800 3 0845 1025  *1A/E*
6 AP THR +98 21 85760 - HELP DESK / ACO OFFICE - A
7 TK TL01JUN/THR1A0980
  
```

Then enter,

FRM

System response:

FQM	THR	FRA	MIL	ROM	VIE					
CTY	DC	TPM	CUM	MPM	DC	LVL	<HGL	>LWL	25M	XTRA
THR	2									
FRA	2 EH	2343	2343	3261	EH	0M	918	0	4076	0
MIL	2 EH	309	2652	2738	EH	0M	86	0	3422	0
ROM	2 EH	307	2959	2544	EH	20M	93	34	3180	0
VIE	2 EH	482	3441	3180	EH	10M	57	102	3975	0
>									PAGE	1/ 1

The system calculates the mileage for whole itinerary.

You may also display the mileage calculation for specific segments as below:

FRM/S2

FRM/S2-5

CHAPTER 2: FARE QUOTE DISPLAY

At the end of this chapter, you will be able to:

1. Display fare for a city pair
2. Explain every detail of fare display
3. Add different options to fare entry
4. Request shopper display

Fare Quote Display

HE FQD

The Amadeus fare display shows published fares based on the options contained in your entry. You may use options to specify airlines, dates, booking class, and so on. You may also request displays where the fares are stored from lowest to highest, or highest to lowest, or according to where the displays show one-way or round trip fares. You may change displays very easily when you begin your search for fares with a wide selection, and then narrow the search.

The Amadeus fare display shows fares based on the options contained in your entry.

FQDTHRDOH

System response:

>									PAGE 1/ 2

The airlines before the common fare (/YY*) indicate that they have filed the fare(s) on the same route. The airlines which are listed after the common fare (/YY*) do not participate in YY fares.

The following table explains the column header you may find in the international fare display:

Header	Contains
LN	Line number (Fare reference number –For use with the FQN ,FQR,FQR,FQK and FQS transactions.)
FARE BASIS	Fare basis give you information about type of fare, type of passenger, class of travel, MIN and MAX stay, reservation restriction, seasonality, and date of travel. A special character before fare basis indicates the following: * The fare is valid only for travel on or After the effective date. - Same day effective date) The fare is valid in one direction only. / Constructed fare.
OW	One-way fare amount
IRR	Currency code of the fares displayed
RT	Round trip fare amount
B	Booking class: + Indicate more than one class applies
PEN	Penalty information: NRF Non- refundable P50 50% penalty 50 Fixed amount (Units of local currency) - No penalty information +/@ Check restrictions in fare note
DATE,DAYS	+/@ More restriction applies) Seasonality apply to outbound (Seasonality apply to inbound S Seasonality L Ticket only on this date A Ticket only on or after this date B Ticket only on or before this date E Travel effective on or after this date O Originate travel on or before this date F Final travel must start by this date C Complete all travel by this date X Fare canceled on this date M Modified fare T Ticket/travel future effective date
AP	Advance purchase requirements Note: This Column refers to ticketing restrictions only. + YES - NO
MIN	Minimum stay: + YES - NO SU SUNDAY RULES
MAX	Maximum stay: + YES - NO
R	Routing information: M MPM fare R Routing fare

You may use the following options with FQD entry:

Entry	Explanation
FQDTHRFRA/ALH	Specific airline
FQDTHRFRA/ALH/CJ	Specific booking class code
FQDTHRFRA/ALH/KF	Cabin position First-class fares = F Business fares = C Premium Economy & Economy fares= Y Only premium Economy fares = W Only Economy fares = M
FQDTHRWAS/ALH/D01SEP*15DEC/IR	Round trip fares only

CHAPTER 3: DISPLAY FARE NOTES

At the end of this chapter, you will be able to:

1. Display fare notes
2. Display fare notes by category
3. Understand different components
4. Find some more options

Displaying a Fare Notes

HE FQN

Fare notes contain the conditions and regulations applicable on specific fare.

It is highly recommended that you look at the fare note/rule before selling the fare and issuing the ticket.

The following fare quote display, illustrates requesting fare notes/rules.

LN	FARE BASIS	OW	USD	RT	B	PEN	DATES/DAYS	AP	MIN	MAX	R	
01	ZSC	1591		3182	Z	-	-	-	+	-	-	R

CHAPTER 5: INFORMATIVE PRICING

At the end of this chapter, you will be able to:

1. Understand the concept of informative pricing
2. Display the component of FQP response
3. Display ticket image
4. Display detail of fare calculation
5. Display fare note
6. Adding options to FQP
7. How to use mask
8. Past date pricing

Informative Pricing

The Amadeus informative pricing transaction allows you to price an itinerary, without first creating a PNR. This is especially useful when you need to find the price for an itinerary, but you are not yet ready to make a reservation.

The accuracy of the response depends on the details of input data provided. You must use airport code instead of city code. So, the system can calculate the appropriate taxes.

If you don't add any specific options to your entry, the system makes the following assumptions:

- An adult passenger type
- The current date for the first segment and an open date for all other segments.
- An open booking class, the system displays the lowest fare for each fare type.
- YY fares for travel agencies, and carrier specific fares for airlines.
- Stopovers at all cities.

You can perform informative pricing by entering transaction FQP code as below:

FQPIKAFRAIKA

System response:

* FARE BASIS	* DISC	* PTC	* FARE<IRR>	* MSG	*T
01 FIF	*	* 1	* 224537000	*RB	*Y
02 CIF	*	* 1	* 146662000	*RB	*Y
03 YIF	*	* 1	* 76228000	*RB	*Y
>				PAGE	1/ 1

Following table describes the heading in the display:

Heading	Explanation
FARE BASIS	The fare basis column
DISC	Discount code column
PTC	Passenger type column Note: In this example, 1 refers to an adult fare. When you request a discount, 1 is the first discount requested, and the adult fare is not displayed.
FARE <IRR>	Fare (Currency is that of your location)
MSG	Message column The message can contain the following codes: FL Flight number restriction applies FQ Frequency (No flights on the date indicated) RB Check booking code (RBD) RE Reservation conditions apply RO Higher booking class required SR Sales restrictions apply
T	Tax indicator column This column indicates if tax is included. You may see the following codes: Y Tax included N Tax not included E Exempt tax

To view the fare component and ticket image in linear format, use the following entry:

FQQ3

System response:

Pricing an itinerary using mask

How to Price an Itinerary Using Informative Pricing:

1. Select the Informative Pricing (FQP) option in the Search By drop-down list.
2. Enter the search criteria.
3. To refine your search, such as add a passenger type, fare type, taxes, click on More Search Options and select the additional search options.
4. Click on Search.
5. Select a fare to display its ticket image.

System response:

Past Date Pricing

The past date pricing option prices an itinerary by using the fare and rules of the date you consider in your entry.

You can use past date pricing up to 12 months in the past.

Note: as Amadeus does not store all fare-related information in historical files, past-date pricing may not result in the correct calculation of taxes, mileage, and hip checks. The result may also be affected by changes in the filing of the fare or rule since the ticketing date.

You must consider past date in your entry as follow:

- /D option for exact departure date (excluding the year)
- /R option for issuing date (including the year)

Enter for example:

FQPIKA/AOS/D01FEB/CQFRA/D02FEBLAX-/D10AUG/ALHFRA-/D15AUGIKA/R,VC-LH,20DEC17

CHAPTER 6: ITINERARY PRICING

At the end of this chapter, you will be able to:

1. Price an itinerary
2. Display fare details
3. Understand the concept of TST
4. Manual and Automated TST
5. PC Flag
6. Updating TST
7. Determine stopover and transfer
8. Pricing options
9. Fare Calculation Mode Indicator
10. Printing a fare
11. Display TST history

The Amadeus itinerary pricing transactions allow you to price the PNR. Depending on which transaction you use, you can store, or not store the pricing response in a TST.

FXX: Pricing an itinerary, without TST creation.

FXP: Pricing an itinerary, with TST creation.

The following conditions apply:

- When only one fare is applicable, the system displays ticket image.
- When several fares apply, the system displays list of fares to choose from.
- When there is only one passenger the system displays ticket image.
- When there are several passengers the system displays a list of passenger and fare detail.
- A fare proposed by the system is valid until you end the transaction by ET or ER.
- The fare displayed after pricing is linked to Amadeus fare server up to 3 minutes.
- The system prices an itinerary with the currency of origin country.

Pricing a PNR

If only one fare type is applicable for an itinerary, the system displays a ticket image and creates a Transitional Stored Ticket (TST).

If more than one fare is applicable for an itinerary, the system displays a list of applicable fares. From this list, you can select the best fare for your client.

The following PNR illustrates how to price the PNR.

```

Transitional Stored Ticket

A TST, or transitional stored ticket, is a record attached to a PNR containing all the ticketing information for a priced flight itinerary. A single TST record can apply to multiple passenger names if the flight segments, fare elements and forms of payment are the same.

There are two types of TST(s):

- **Manual Stored Ticket (MST)**
- **Automatic Stored Ticket (AST)**

Manual Stored Ticket:

A manual stored ticket is a TST that you create manually, or it is an automatic TST that has been updated manually. The pricing indicator M indicates that the TST is manual.

Automatic Stored Ticket:

An automatic stored ticket is automatically created by the system as a result of a PNR itinerary pricing command (FXP). The system uses the TST to issue the ticket. After the system creates a TST, TST identification is placed on the header line of the PNR. This indicates that a TST is attached to a PNR.

The following information is stored in the TST:

1. Line entitlement
2. Stopover / Transfer indicator
3. Not valid before / Not valid after dates
4. Baggage allowance
5. Fare basis / Ticket designator
6. Fare including currency code
7. Equivalent fare including currency code
8. Tax, including currency code, ISO country Tax code
9. Total fare including currency code
10. Grand total
11. Net fare
12. Fare calculation
13. Origin / Destination indicator
14. International sales indicator (manual TSTs only)
15. Ticket type indicator
16. Banker's rates of exchange
17. Endorsement / Restriction

Display a TST

The system displays the actual TST if only one and no deleted TST's exist. If the system finds more than one active TST, a list of all active TSTs is displayed. You may find the deleted TSTs in TST history by **TTH** entry.

TQT or TQT/T1

Here you can find TST example:

```

```

To delete a specific TST or all TSTs, you may use the following entry:

TTE/T1 or TTE/ALL

PNR Change Flag (PC Flag)

You can modify the TST itinerary automatically, or manually. When the itinerary or the name has been changed, the system automatically adds a message (PNR CHNG) to the TST. The system also changes the pricing indicator from automatic (I) to manual (M).

The following example shows a TST with a PNR change flag:

```

TST00001  PC THR1A0980 SH/07MAY M 0 LD 10MAY18 1532 OD THRFRA

ROE1.000000

5.FE FARE RESTRICTION MAY APPLY
6.FV LH

```

When flight time in a PNR changed, the system updates the TST by replacing the original flight times with the new one.

When a status code in a PNR is changed to KK, KL, NO, UC, UN, UU or US, the flight is retained in the TST, but the status code in the TST is removed, leaving a blank.

When a status code is changed to HK and RR, the status code in the TST is changed to OK.

Note: the PNR change flag must be removed to issue the ticket.

To delete a specific TST you may use the TST number in your entry if multiple TST exist. The TST select option cannot be combined with other TST options.

Example:

TTF/T1

TTF Transaction code
/T1 TST selects option

Response: TST flag removed

The TST change flag is also removed from the TST index.

To remove the PNR CHNG flag from all existing TSTs, enter:

TTF/ALL

TTF Transaction code
/ALL Indicates all TST

Response: All TST flags removed

Manually updating the TST itinerary

When you modify the itinerary manually, to update the TST use **TTU** entry.

The TTU entry updates the TST with all new flight information added to the PNR after TST creation.

Look at the following example:

```

--- TST RLR ---
RP/THR1A0980/THR1A0980          SH/SU    8MAY18/0525Z    QUJO8K

```

Now you can remove PC flag and update TST fields like fare basis, NVA, baggage allowance and etc.

Create a Manual TST

You may create a manual TST if the system is unable to price a PNR or if you need to override system pricing. After creating an empty TST, you fill it manually with ticketing and fare information.

To create a TST or TSTs manually, enter:

TTC

This entry creates an empty TST shell for each group of same type passengers. For example, infants in one TST, children in second TST, and adults in third one.

In following example, you learn how to create a manual TST.

```
RP/THR1A0980/THR1A0980          SH/SU    8MAY18/0634Z    QUNSU5

Stopovers and Transfers

The term transfer refers to a connection. If a one-way itinerary contains more than one segment, or if a round-trip itinerary contains more than two segments, Amadeus assumes a transfer if the duration at a city is within the following:

- Up to 4 hours in the US, Canada, Puerto Rico and Virgin Islands, for wholly domestic fare components.
- The same day in Australia and New Zealand for wholly domestic itineraries.
- Up to 24 hours everywhere else.

The system prices to allow stopovers at all locations, if nothing is specified. However, in some cases you may need to override the stopover assumptions. If you do override, this will be reflected in the following warning added to the pricing display:

Stopover/transfer override *u*

To mark segment transfer point use option **/SnX** as below:

FXP/S4X

FXP/S4X,6X

To mark segment stopover point use option **/SnS** as below:

FXP/S3S

FXP/S3S,6S

Pricing Options

You can use these options after FXX or FXP:

Entry	Explanation
FXP/INF	Price Infant passenger
FXP/PAX	Price all non-Infant passenger
FXP/B2	Fare break point
FXP/B2/B5	Fare break points
FXP/P3	Specific passenger
FXP/S5-6	Specific segments
FXP/S4X	Segment 4 as transit
FXP/S4X/S6X	Segments 4,6 as transit
FXP/R,FRA.THR	Point of sale
FXP/R,12MAR18	Past date pricing
FXP/R,VC-XY	Validating Carrier
FXP/L-LRCIR	Pricing by fare basis
FXP/L3,4-MEE2MIR/L5-Y/L6-Y/L7,8-MEE2MIR	Pricing by different fare basis
FXP/RS67 or FXP/RCD	Pricing for Senior Citizen passenger

Tax options

You may use these options to manipulate taxes in fare calculating. The following table contains some example:

Entry	Explanation
FXP/R,ET	Exempt all taxes
FXP/R,ET-AV-IR	Exempt AV,IR taxes
FXP/R,WT	Withholds all taxes
FXP/R,WT-AV-IR	Withhold specifics taxes

Past Date Pricing

The past date pricing option allows you to price an itinerary for past date.

Look at the following example:

```
RP/THR1A0980/THR1A0980          SH/SU    7MAY18/1044Z    QSCDI3

```

To price the PNR for 15APR18, enter:

FXP/R,15APR18

Fare calculation pricing indicators

HE FCPI

The system generates a fail code, or fare calculation mode indicator, when you price or print a ticket. These codes are printed on the ticket, displayed in a ticket image and stored in the **TST**.

The code can be either a letter or number, to indicate how the itinerary priced.

The **TST** indicators can be one the following:

TST Indicator	Description
I	IATA automatically approved
M,N	Manually priced
T	Inclusive tour fare, automatically priced
F	Negotiated auto priced fare

The following table contains the fail codes, with information on how they are created.

TST Indicator	Fail code	Message	Explanation or entry
M	V	Pricing override used	FXP/R,10DEC17
O	W	RBD override used	FXV2
I	0	Automatically priced	No special condition
M,N	1	Manually stored fare	You have manually created the TST, or updated it.
M	4	Manual manipulation of taxes	FXP/R,WT
I	5	Not priced at passenger type request	The system did not price the itinerary according to the passenger type you entered.
F	N	Negotiated rates	FXP/R,U

Example of a ticket image, TST

Display TST history

TST history records additions, changes and deletions of current TST and deleted TST. Deleted TST history contains deleted TSTs. TSTs are deleted in the following situations:

- A TST has expired
- A deleted TST entry has been performed
- A manual TST has been created for a passenger who already has a TST
- A passenger's journey has been repriced and a TST for that passenger already exists
- A passenger's name has been canceled from the PNR when a TST exists for that passenger only
- An adult passenger, with an associated infant, has been canceled (the infant TST has been deleted)
- An entire itinerary has been canceled
- Part of an itinerary for which there is a TST has been canceled

The number allocated to a new TST is unique and cannot be reused within the same PNR for another TST. This number allows you to identify the TST for the entire life of the PNR.

When only one TST exists for a PNR, make the following entry to display the TST history:

TTH

If more than one TST exists, this entry displays a TST list or index and you must specify the TST number for which you want to see the history enter, for example:

TTH/T2

TTH	Transaction code
/T2	Slash, TST identifier and number

CHAPTER 7: BEST BUY

At the end of this chapter, you will be able to:

1. Display lower fares
2. Find the lowest fare with automatic rebooking
3. Display lowest possible fare
4. Find the lowest fare with manual rebooking

Amadeus Best Buy pricing enables you to price a PNR with the lowest available fare for a booked itinerary. It checks for lower fares and availability in lower booking class or for lower fares in the same booking class as already booked.

The system suggests only fares that are applicable to the itinerary and the passenger type. It also checks the rule conditions, such as advance purchase, and minimum and maximum stay requirement.

Best Buy can automatically rebook an itinerary in lower booking class, by using the highest access. Alternatively, the system can inform you about lower fares without rebooking, to enable you for checking the suggested fare if it is suitable for the passenger, without changing the PNR.

You can also choose to store, or not to store the pricing response in a TST.

The Amadeus Best Buy functionality consists of the following transactions:

Entry	Explanation
FXB	Rebook automatically to the lowest available fare and create a TST
FXR	Rebook automatically to the lowest available fare without create a TST
FXA	Display a list of lowest available fares
FXU	Select a fare after FXA ,rebook and create a TST
FXL	Display lowest possible fare and indicate seat availability

Best buy with Automatic Rebooking

If you use the entries FXB and FXR, the system automatically rebooks an itinerary in a class that is lower than the class in the booked itinerary. FXB creates a TST, FXR does not.

The following PNR illustrates the best buy function.

```

RP/THR1A0980/THR1A0980          SH/SU   9MAY18/0550Z   QXG88A
